# Getting started with Google Play Books for iPhone, iPad and iPod touch

Welcome to Google Play Books, the world's largest eBookstore with millions of titles available! To add more books, from today's bestsellers to the free classics and everything between, visit the Google Play store on the web or in your Android devices.

Google Play Books makes reading fun and easy and supports the following features:

- Bookmarks
- Highlighting
- Note-taking
- Search in the book or on the web
- Dictionary
- Translation
- Text layout, brightness adjustment and other display options

To get more details on how to use Google Play Books, or to request assistance from our support staff, please tap on the gear icon (⚙) on the home screen and choose the corresponding menu option (on devices smaller than iPad, you will need to “pull down” to expose display options and the gear).

Thanks for reading on Google Play and enjoy!

The Google Play Books team
